

The Clean, Efficient & Practical Way of Cleaning Crops

Drying and safe storage of crops starts with efficient cleaning

- The aspirator is used to separate light impurities from grain, maize, peas and beans
- It may be advantageously installed to allow crop passage through the cleaner immediately after intake, after drying and before storage
- The body of the aspirator has a louvered base allowing the fan to draw air through the crop

Model:
AS-2045

Aspirator

AS-2045

Model: AS-2045	
	Dimensions (mm): 1150(L) x 564(W) x 1458(H)
