## Testing Rice Grader CRZ

The Zaccaria Testing Rice Grader model CRZ is a handy piece of equipment that has the purpose of grading the sample rice by length or thickness. Since the separation principle is the same as the one used in the industrial design, it gives accurate results every test operation.

This machine is essential in the rice business as, by grading the rice, it is possible to obtain the yield of the milled rice, ensuring quality of the product to be packed. Also, being a handy unit, it can be used either at the rice milling area or in the laboratory.

Model:

**CRZ**

Motor power (w):

9,0

Capacity - sample rice (g):

100

Approx. Shipping volume (dcm<sup>3</sup>):

20

Approx. weight including one indented cylinder (kg):

8,50

Machine dimensions (mm):

A	B	C	D
200	314	240	150

### CONSTRUCTION AND FUNCTION CHARACTERISTICS

- Separation of broken rice from whole grain rice through an indented cylinder;
- Separation of chalky or red rice through a rotating sieve (optional);
- Compact design;
- Includes one indented cylinder (normally 5,5 mm indent size) as standard.

### FEATURES

- Accurate and uniform test results;
- Easy initial setup;
- Easy operation, maintenance and transportation.

### OPTIONAL EQUIPMENT

- Digital scale;
- Indented cylinders of different size indents available;
- Set of thickness grading cylinders of several different size slots available.

Indented cylinder

Set of thickness grading cylinders for testing cereals.

Digital scale (optional)
